KLUŚ® Inspiring Solutions

## PRODUCT DESCRIPTION

- Designed to reach an IP67 waterproof rating
- Appealing form
- Ability to create a line of light
- Good heat dissipation

FINISH :

Silver anodized ☐

*Custom colors available upon request

TECHNICAL SPECIFICATION

Application

- for construction of linear suspended lighting fixtures

Assembly

- with electricity conductive end caps
- with mounting brackets and fasteners offered by KLUŚ

Additional information

- possibility of making a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof
- achieving IP67 is possible with the following covers: LIGER, KA, HS, KA-PRO and KA-COM
- a wide range of accessories
- space for LED strip: 11.2 mm

Profile bending with covers: HS, LIGER, KA.

Minimum internal radius	Minimum external radius
200 mm	400 mm

- minimum radius - bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the profile
- internal radius - refers to the profile bent so that the cover is facing the inside of the arch
- external radius - refers to the profile bent so that the cover is facing the outside of the arch
- irregular curves are possible after consultation and individual quotation
- when bending anodized profiles, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius)
