PRODUCT DESCRIPTION

*** Available until stocks are depleted ***

- Designed to reach an IP67 waterproof rating
- Masking the edge of the groove
- Construction of high efficiency lighting fixtures
- Good heat dissipation

FINISH :

Silver anodized ☐

*Custom colors available upon request

TECHNICAL SPECIFICATION

Application

- for construction of flat, recessed lighting fixtures with high luminous efficiency

Assembly

- in grooves with appropriately selected screws for the mounting surface
- with mounting adhesives appropriately selected for the surface

Additional information

- possibility of making a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof
- space for LED strip: 13.1 mm

Profile bending

Minimum internal radius	Minimum external radius
200 mm	200 mm

- minimum radius - bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the profile
- internal radius - refers to the profile bent so that the cover is facing the inside of the arch
- external radius - refers to the profile bent so that the cover is facing the outside of the arch
- irregular curves are possible after consultation and individual quotation
- when bending anodized profiles, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius)
