- can be mounted in a groove made using a mounting extrusion
- a line of light obtainable with the **LIGER-22** cover and a LED strip with a minimum of 120 LEDs/meter

### Profile bending

Minimum internal radius	Minimum external radius
-------------------------	-------------------------

250 mm	350 mm
--------	--------

- minimum radius - bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the profile
- internal radius - refers to the profile bent so that the cover is facing the inside of the arch
- external radius - refers to the profile bent so that the cover is facing the outside of the arch
- irregular curves are possible after consultation and individual quotation
- when bending anodized profiles, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius)
