

PRODUCT DESCRIPTION

- The satin cover allows you to obtain different light angles
- The S-SATIN cover thanks to the focusing properties strengthens the power of the LED source on the illuminated area, depending on the distance from the LED strip
- It eliminates the greenish color on its periphery in the stream of light
- It also gives a more uniform stream of light, mitigating the phenomenon of streaking
- The cover is characterized by its high transparency, quality and uniform cross-section
- High stiffness
